

Don't Miss the Opportunity to Save Water AND Money

Lomita residents will be able to participate in two rebate programs with the Metropolitan Water District of Southern California for the purchase of water-saving equipment this coming January.

Multi-Family Property Toilet Replacement Program

Families can receive up to \$250 – six times more than the standard rebate – for the installation of high-efficiency toilets that replace older models in apartment buildings and multi-family complexes built prior to 1994.

Toilets with a flush volume greater than or equal to 3.5 gallons per flush (gpf) may qualify for up to a \$250 rebate with the replacement of a toilet with a volume less than or equal to 1.1 gpf. There is also a second-tier rebate of \$125 available to replace toilets with a volume of 1.6 gpf.

To participate in this program, the following is required:

- Pre-installation inspections of property to verify existing toilet flush volumes.
- Post-installation inspections of property upon completion of projects.
- Previous toilet rebate program participants are not eligible.

(See back for more information.)

Water Flow Monitoring Device Pilot Program

Residential flow-monitoring devices allow you to see how much water you are using in real-time via a mobile device app. This provides insight on water habits and also helps detect leaks. Anyone interested in this program would choose from a list of eligible devices with a range of costs, features and installation methods. Rebates offered will be between \$100 - \$150.

Participate Early!

Past rebate programs with the Metropolitan Water District of Southern California were extremely popular, with spots filling up less than 30 minutes after the program was made available. Therefore, we encourage all Lomita residents to subscribe to the program as quickly as possible!
