

Every Drop Counts!

As part of the City of Lomita's 2020 Urban Water Management Plan, the following water conservation requirements shall apply to all persons within the city.

Remember, as drought conditions change, water conservation measures may also change.

No lawn/landscape watering between 10 a.m. and 8 p.m.

Restaurants to provide water to customers only on request

Motels to provide guests the option of having towels/linens laundered daily

Irrigation is limited to 3 days per week (June 1-Oct 31) and once per week Nov-May

For conveyor style car washes, installation of water recycling system

No excess water runoff from lawn/landscape areas

Timely repair of pipe breaks or water leaks

Use of hand-held bucket or hose with a quick release shutoff nozzle when cleaning a vehicle

City of Lomita Publishes 2020 Urban Water Management Plan

The Lomita City Council voted unanimously during their May 18 regular meeting to adopt the 2020 Urban Water Management Plan (UWMP), which includes newly revised drought policies for the Lomita community.

What is an Urban Water Management Plan?

Prepared every five years, the UWMP acts as a long term resource planning tool for water agencies and is a source of information to guide updates to general plans and beyond. The plan describes and evaluates reasonable and practical efficient water uses, recycling and conservation activities to ensure adequate and reliable water supplies. Factors considered while developing the URMP include: current & projected land uses, potential water supply projects, seismic risk assessments, five year drought projections and more.
