

Happy Holidays from Lomita Water! Whether you are planning to decorate your home or enjoy some special holiday meals, we encourage you to follow the tips below to help save water this holiday season:

If putting up a Christmas tree, consider a real tree – which studies show has a lower water footprint than an artificial tree.

Defrost frozen foods in the refrigerator rather than using running water.

Wash dishes in a dishwasher if possible, and only run the dishwasher when it is full.

If washing dishes by hand, use two basins – one with soapy water and one with rinse water – rather than using running water.

Scrape food scraps into the garbage or compost bin, instead of using the garbage disposal – which uses up to 4.5 gallons of water per minute.

Never put Fats, Oils, and Grease (or FOG) down the drain or even the garbage disposal. Instead, let FOG cool and dispose of it in your trash can.
